

**Little Remodeler Playhouse**

Jeannette L. Smith, inventor

**REPLACEMENT SHEET****Abstract**

A playhouse kit which includes a building constructed of melamine, white board or a wood or plastic product that when completely finished leaves a paintable outside surface and a clean, slick, nonporous inside surface. The kit also includes two cans of water color paint, a paintbrush, paint roller and paint tray, allowing the child to paint the playhouse. It comes with plain paper with no design, stamps, and stamp pad(s) so that the child can make their own wallpaper which has an adhesive already sprayed on one side, giving the wallpaper the ability to be applied, taken down and reapplied repeatedly. The kit also comes with elongated plastic pieces made to resemble brick and elongated plastic pieces made to resemble cedar wood panels to be added to the front of the playhouse. Plastic materials with a shake roof appearance, being rough, uneven and wooden in appearance are also included to be added to the plastic roof. Plastic, stone look squares are included to be added to the plastic floor completing the remodeling of the playhouse.
